

Plate Rolling Machine

3 Roll Pyramid Type Hydro-Mechanical Plate Bending

Model No: DI-095

Features

The 3 Roll Pyramid Type Hydro Mechanical Plate Bending Machines are designed with top roll UP & DOWN movement by hydraulic cylinder. This saves time & labor to adjust top roll. This feature makes the machine more productive and suitable for handling heavy jobs. Dropper end movement is done by hydraulic cylinder.

Technical Specifications

Production Specification	Plate width max. (mm)	Plate Thickness max. (mm)	Min. rolling dia. (mm)	Upper roller dia. (mm)	Upper roller dia. (mm)	Lower Roller dia. (mm)	Lower Roller dia. (mm)	Lower roller central distance
