

## Hacksaw Machine

### Hacksaw Machine (Semi-Hydraulic)

**Model No: DI-056**

## Technical Specifications

MODEL	DI-094A
Cutting Round	165
Capacity Square	150
No of stroke per min	65
Blade Size (mm)	350
Approx Weight Kg	300
Motor (1440 RPM)	1 HP

## Features

- It is featured with improved mechanisms to remain supportive for different machining requirements in different industries.
- It is one of the best tool room supportive devices.
- It helps in obtaining parallel cutting operations.
- It is incorporated with two speed operating mechanism with which the operator will be able to select the preferable speed for cutting in accordance with the metal compatibility.
- The vice guide ways have been provided for precisely clamping the work material.
- The hydraulic cutting pressure control system provides different cutting options that make this equipment stay versatile for multiple industries.
- We have both semi-hydraulic and mechanical models of hacksaw machines.
